- You pay weekly • Clients pay in 90 • Monk closes the gap

Typewriter Sentence Case

For all tests, it is recommended to use sentence case - this makes communication calmer, more modern, and more natural. Use Title Case only when you want to signal importance, like in headlines, where every word should be capitalized.

3 Questions to Ask Before You Buy AI Finance Software in 2026

Punctuation

In headings, subheadings, tags, and short standalone text boxes, a period is not used at the end. In the main text and complete sentences, standard punctuation is used.

3 questions to ask before you buy AI finance software in 2026.

Line Breaks

Line breaks in headings should preserve meaningful and grammatical groups.

Avoid breaks that separate a subject from its verb, a verb from its object, or prepositions from their phrases.

Aim for balanced lines with the end of the line no more than two to three words shorter than the line above it.

Avoid hanging words, short words at a paragraph's end.

3 questions to ask before you buy AI finance software in 2026

Text Emphasis

In headings and subheadings, the key phrase can be highlighted with a solid color block.

Use this sparingly, typically for one or two phrases per page, to draw attention to the most important words.

The example below is on the verge of acceptable use. It emphasizes only phrases (longer color block), highlighting only the corresponding sentence in the main text, which causes the interpretation to appear scattered.
